Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-15, 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vrba (6,168,621) in view of Alt et al. (5,843,117). Vrba discloses a method for delivering a self-expanding and balloon expanded stent comprising the steps as claimed (figures 2-3) except fail to disclose the steps of inflating a balloon so as to trap a stent between the balloon and an outer tube. Alt et al. disclose slight inflating the balloon at its ends to prevent a stent from being dislodged and retaining the stent firmly centered along the balloon's length during delivering. Therefore, it would have been obvious to one having ordinary skill in the art to modify the Vrba reference by adding the step of inflating a balloon in order to retain the stent firmly on the balloon during delivering. Doing so would meet all the limitations of the claims.

Allowable Subject Matter

3. Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
